Kushal Sharma

Technical Architect | Cloud-Native Data Engineering | Python · AWS · Databricks
sharma.kushal.089@gmail.com · +91-9980619569 · Delhi, India · LinkedIn

PROFILE SUMMARY

Technical Architect with 10+ years designing and delivering cloud-native data and AI systems for Fortune 500 clients. Expert in event-driven AWS architectures, Python-based pipeline engineering, and Databricks data platforms. Proven ability to own end-to-end solution design — from data traceability and schema evolution to multi-agent AI observability — and deliver across enterprise supply chain and finance domains.

SKILLS

Category	Skills
Cloud & Infrastructure	AWS (Step Functions, Glue, Lambda, SQS, SNS, EventBridge, S3), Kubernetes (KEDA), Docker, Event-Driven Architecture
Data Engineering	Databricks, Spark, OpenLineage, ETL Pipeline Design, Schema Evolution, Data Lineage
AI/ML & Gen AI	Python, Agentic AI, LLM Fine-Tuning (LoRA), Langfuse Observability, Prompt Engineering, Gen AI Architecture
Domain	Supply Chain, Order-to-Cash, Data Traceability, Pharma Analytics

PROFESSIONAL EXPERIENCE

Accenture Solutions — Associate Manager

Jun 2019 – Present · Noida / Delhi

Technical Architect | Enterprise Data Pipeline (AWS)

Jan 2026 – Present

- Architecting cloud-native data pipeline for enterprise expense and trip data processing — end-to-end design through implementation in Python
- Designed orchestration using AWS Step Functions coordinating Glue ETL jobs, Lambda, SQS/SNS, and KEDA-scaled K8s workers
- Built event-driven architecture: SNS notifications trigger Lambda to initiate Step Function executions with dynamic workflow strategies per data type
- Implemented strategy-based pipeline routing — Lambda imports workflow steps from strategy files and passes execution plans to Step Functions for ordered stage execution
- Python powers Glue ETL jobs for data reduction and K8s workers for API-driven enrichment, with output to S3 egress buckets

QA & Observability Lead | Enterprise AI Orchestrator

Jul 2025 – Dec 2025

- Built QA automation framework for a production multi-agent AI orchestrator spanning Warehouse Management, Demand Planning, Yard Management, and Transport Management agents
- Set up Langfuse observability infrastructure monitoring LLM traces, token costs, and latency distributions across the orchestrator's full agent ecosystem
- Engineered integration, regression, smoke, and performance testing across 5 core microservices; designed Pub/Sub layer testing validating multi-hop context passing across agent boundaries

Data Engineering Lead | Data Traceability (Databricks)

2023 – Jun 2025

- Led data engineering on Databricks: Spark ingestion jobs, processing pipelines, and OpenLineage-integrated lineage tracking across ingestion, distribution, interop, and egress layers
- Built automated schema evolution system using Agentic AI — impact analysis, DDL/DML generation, and cross-fabric validation on schema changes

Solutions Lead | Order-to-Cash Platform · *2021 – 2023*

- Delivered cloud-based Collections and Cash Application platforms end-to-end; led cross-functional delivery across development, vendor, and business teams

Implementation Lead | Blackline Cash & Collections · *2019 – 2021*

- Led global implementations of Blackline Cash and CreditManager across 6 manufacturing, energy, and retail clients; developed VBA automation for ERP integration

---

ZS Associates — Technology Analyst · Feb 2017 – Apr 2017

Infosys Ltd. — Senior Systems Engineer · Feb 2014 – Feb 2017

CERTIFICATIONS

- Claude Certified Architect – Foundations (CCA-F) (Apr 2026)
- Databricks Certified Generative AI Engineer Associate (May 2025)
- Databricks Certified Machine Learning Engineer Associate (May 2025)
- Databricks Certified Data Engineer Associate (May 2025)
- IBM Machine Learning Professional Certification — Coursera (Apr 2024)

AWARDS

- Growth Catalyst Award, Q2 2026
- Star Performer Award, Q4 2024
- Exemplify Client Centricity, Q4 2023
- Accenture Celebrates Excellence Award, Q1 2021
